“Dyslexia is a specific learning disability that is neurobiological in origin. It is characterized by difficulties with accurate and/or fluent word recognition and by poor spelling and decoding abilities....the technical ingenuity of this recent dyslexia simulation coupled with the dynamism of the Internet makes this one compelling, powerful, and deeply troubling. Dyslexia is a complex, lifelong disorder involving difficulty in learning to read or interpret words, letters and other symbols. Dyslexia does not affect general intelligence, but is often co-diagnosed with ADHD. Dyslexia: an overview of recent research . Abridged from Everatt and Reid From Reid, G. (ed.)
