

# Download Atlas Of Virtual Colonoscopy

Bowel Cancer Australia is the leading community-funded charity dedicated to prevention, early diagnosis, research, quality treatment and care for everyone affected by bowel cancer (also known as colorectal cancer). Definition Colonoscopy is an endoscopic medical procedure that uses a long, flexible, lighted tubular instrument called a colonoscope to view the rectum and the entire inner lining of the colon (large intestine). View program details for SPIE Medical Imaging conference on Image-Guided Procedures, Robotic Interventions, and Modeling Screening is the process of looking for cancer in people who have no symptoms. Several tests can be used to screen for colorectal cancer (see American Cancer Society Guideline for Colorectal Cancer Screening).
