Anatomy of the atlas joints. As mentioned already, the atlas joints are made up of the A-A and A-O joints. The atlantoaxial (A-A) joint is a special cervical level, as it yields more rotation than the other cervical vertebrae. Causality (also referred to as causation, or cause and effect) is what connects one process (the cause) with another process or state (the effect), [citation needed] where the first is partly responsible for the second, and the second is partly dependent on the first. A. A1C A form of hemoglobin used to test blood sugars over a period of time. ABCs of Behavior An easy method for remembering the order of behavioral components: Antecedent, Behavior, Consequence. Simply stated, the spinal canal is a hole down the center of your vertebral column. Your spinal cord is located inside this hole. The spinal cord is a very key part of the central nervous system, which is comprised only of the "cord", as it is often called for short, and the brain.
