This Chip Carving Knife from Flexcut is a take on a traditional shape designed for the craft of chip carving. It is a short-bladed knife used to make the triangular shaped cuts that create the intricate, often geometric designs common to the craft. Carving is the act of using tools to shape something from a material by scraping away portions of that material. The technique can be applied to any material that is solid enough to hold a form even when pieces have been removed from it, and yet soft enough for portions to be scraped away with available tools.
