

# Download Directed Continental Drift Answer Key

In geologic terms, a plate is a large, rigid slab of solid rock. The word tectonics comes from the Greek root "to build." Putting these two words together, we get the term plate tectonics, which refers to how the Earth's surface is built of plates. The portrait photographer's earliest work, now on display for the first time in a Hauser & Wirth show, makes her wistful for the old days: "It was just so pure and energetic and out there". Herbicide is a non staining selective pre-emergent herbicide that can be sprayed on turf, over the top of field and container-grown landscape, and nursery ornamentals. This year you are going to be learning about the world. We'll go into the earth, under the ocean, and even out into space. Let's start with the world and look at a map.
