

Download Economic Instruments For Environmental Protection

In environmental law and policy, market-based instruments (MBIs) are policy instruments that use markets, price, and other economic variables to provide incentives for polluters to reduce or eliminate negative environmental externalities. Environmental protection is the practice of protecting the natural environment by individuals, organizations and governments. Its objectives are to conserve natural resources and the existing natural environment and, where possible, to repair damage and reverse trends.² protection as a pre-condition to the enjoyment of internationally-guaranteed human rights, especially the rights to life and health. Environmental protection is thus an essential instrument in the effort Reducing Childhood Lead Exposure. The President's Task Force on Environmental Health Risks and Safety Risks to Children released the Action Plan to help federal agencies work with stakeholders to reduce children's exposure to lead and improve children's health.
