

Download Fish Are Animals: Concept Science

Like all animals, fish need to survive and grow large enough to reproduce. Fish that make it to adulthood and to spawning time use a range of strategies to ensure successful reproduction. Southwest Fisheries Science Center biologist Nick Wegner holds a captured opah, the first-ever warm-blooded fish.. Bees understand the concept of zero. By Matt Warren Jun. 7, 2018 , 2:00 PM. Humans' invention of zero was crucial for modern mathematics and science, but we're not the only species to consider ... Whether fish feel pain similar to humans or differently is a contentious issue. Pain is a complex mental state, with a distinct perceptual quality but also associated with suffering, which is an emotional state.
