I found a really good deal on a perfectly functional Ford 501 with three extra complete blades, but understand they dont work on the newer style tractors 3-point. Is there a retrofit for this, or a known easy fix for someone good with a welder? Any help would be great! TSC or webbs sickle service are good places to get parts. You will need to figure a way to attach the mower left arm to the tractor lift arm. This one carries your cutterbar when you raise your mower with the 3 point lift. I just purchased a rough 501 sickle bar mower--7 footer. I tore it down and have all the compents working. I have look d locally but havent been able to find knives, guards and guides for the ford 501.
