

Download Furnishing The Mind Concepts And Their Perceptual Basis Representation And Mind Series

Academia.edu is a platform for academics to share research papers. A mental image or mental picture is the representation in a person's mind of the physical world outside that person. It is an experience that, on most occasions, significantly resembles the experience of perceiving some object, event, or scene, but occurs when the relevant object, event, or scene is not actually present to the senses. Four philosophies of learning are contrasted, namely 'simple' constructivism, radical constructivism, enactivism and social constructivism. Their underlying explanatory metaphors and some of their strengths and weaknesses are contrasted, as Founded by a small group of philosophers over a grey New Jersey weekend in April 2003, the Moral Psychology Research Group fosters collaborative interdisciplinary research on human mentation and morality.
