This book is written by one of the key researchers, who is an intellectual force, in the field of health inequalities. A professor of Medical Sociology at University College London, Mel Bartley has played a distinguished role in this field for a number of years; this book further adds to his contribution. The methods most commonly employed by health inequality researchers are carefully explained in simple terms in a way that enables readers to judge for themselves how good the evidence is for each theory. It makes concepts and methods more widely available which can be applied to any area of study that seeks to take account of social and biological factors.
