

# Download High Speed Enterprise Networking

The Fiber Optics Transceiver and Coherent products are now part of the Foxconn Interconnect Technology product portfolio. Please visit the FIT web site for more information on Fiber Optics products. CommScope's High Speed Migration platform includes the fiber, connectivity, design and management solutions you need to keep your infrastructure agile and flexible, efficient and easily scalable—no matter how fast things change or which type of architecture you choose. CommScope's high-speed migration platform gives you the agility, speed and density you need while keeping your infrastructure efficient and manageable. Proven to withstand the harshest environments of aerospace, land, automation and energy applications, Gore delivers solutions that have been relied on and trusted for decades.
