Conflict of interest statement- The content of this continuing nursing education offering has not been influenced by any emolument, nor does RnCeus endorse any product or service. Mikel Gray, PhD, FNP, PNP, CUNP, CCCN, FAANP, FAAN. Abstract. Incontinence associated dermatitis (IAD), sometimes referred to as perineal dermatitis, is characterized by inflammation and/or erosion of the skin associated with exposure to urine or stool. Urinary incontinence is the unintentional passing of urine. It's a common problem thought to affect millions of people. There are several types of urinary incontinence, including: Incontinence Advisors are proud to be working with Age Co, the trading arm of Age UK - the leading charity for the elderly, to offer a great choice of incontinence products suited to different needs and levels of incontinence.
