

Download Intelligent Vehicle Technologies

An intelligent transportation system (ITS) is an advanced application which, without embodying intelligence as such, aims to provide innovative services relating to different modes of transport and traffic management and enable users to be better informed and make safer, more coordinated, and 'smarter' use of transport networks. The purpose of the 5th International Conference on Vehicle Technology and Intelligent Transport Systems (VEHITS) is to bring together engineers, researchers and practitioners interested in the advances and applications in the field of Vehicle Technology and Intelligent Transport Systems. Unmanned Vehicle Technologies (UVT) is the leader in commercial and industrial drone systems. Ask us about our commercial leasing program! DJI, FLIR, Aeryon Labs, AceCore Technologies & more. Intelligent speed adaptation (ISA), also known as alerting, and intelligent authority, is any system that ensures that vehicle speed does not exceed a safe or legally enforced speed.
