

# Download Machining Rotors Manual Guide

1 1. General HANBELL LB series semi-hermetic twin-screw compressor is developed especially for low temperature application such as refrigeration system, freezers, instant-cooled machine, processing cooling machine and ice storage system. Turbine Blades and Vanes. TURBOCAM brings over 30 years of 5-axis machining experience in aeroengine compressor blisks and rocket turbopumps to the world of blades and vanes. The BL505 combination brake lathe brings speed, precision and versatility to the brake shop. The unique design of this combination lathe allows the operator to change the setup of the brake lathe from rotors to drums and vice versa with unprecedented speed and ease. 1 1. General HANBELL series semi-hermetic screw compressor is developed especially for applications in air-conditioning and refrigeration. With high operating load design, each HANBELL compressor is of high efficiency and reliability in all
