

# Download Making The Mirv : A Study Of Defense Decision Making

National missile defense (NMD) is a generic term for a type of missile defense intended to shield an entire country against incoming missiles, such as intercontinental ballistic missile (ICBMs) or other ballistic missiles. After the Partition of India in 1947, India and Pakistan have been in conflict over several issues, including the disputed territory of Jammu and Kashmir. The uneasy relationships with India, Afghanistan, the former Soviet Union, and the energy shortage explains its motivation to become a nuclear power as part of its defence and energy strategies. Nuclear weapons have long played a central but often unappreciated role in American grand strategy. In spite of the unimaginable consequences of their use in war, we know far less about how the bomb shapes U.S. national security and world politics than we... As I tried to explain earlier, the animations show estimated range for these hypersonic missiles (the warhead is the payload nuclear device and it can have various area of effect based on the altitude it is detonated).
