Upgrading the home theater to top performance levels requires the use of an AV preamplifier. According to reviewer Tracy Rainwater, you'd be hard pressed to find one better than the Marantz AV7005 ...Well, that's extremely disappointing to hear... The only reason I chose this over the MX-780 was the rechargeable battery (and the slightly bigger screen was a small plus) but I may consider switching it out if this is the case. Two shots of the rear connection panel with decent resolution are in circulation and although the position of the DVD logo differs, in both cases it's the DVD-Audio/Video logo.
