

Download Metrics For Software Conceptual Models

GQM, the initialism for "goal, question, metric", is an approach to software metrics that has been promoted by Victor Basili of the University of Maryland, College Park and the Software Engineering Laboratory at the NASA Goddard Space Flight Center after supervising a Ph.D. thesis by Dr. David M. Weiss. Cradle by 3SL is a requirements management software & a systems engineering software tool, comprising MBSE, agile development, document & project management. Mental Modeler is modeling software that helps individuals and communities capture their knowledge in a standardized format that can be used for scenario analysis. Software quality according to Feigenbaum. Quality is a customer determination, not an engineer's determination, not a marketing determination, nor a general management determination.
