Environmental Awareness - Naturalist Intelligence Environment is the area in which we live and share. The thin layer of air that surrounds our planet that supports life. Abstract. An overview of the complexity leadership literature is provided. This includes a history of complexity theory and its core concepts, the central propositions of complexity leadership, a review of six prominent frameworks, and a summary of practitioner guidelines. A fractal is a geometric form in a non-integer number of dimensions, meaning that they do not fill up a whole 2-D or 3-D space. Fractals also have self-repeating structures. In computer science, artificial intelligence (AI), sometimes called machine intelligence, is intelligence demonstrated by machines, in contrast to the natural intelligence displayed by humans and other animals.
