

Download The Scientific Credibility Of Folk Psychology

Distinguishing the effects of beliefs and preconditions: the folk psychology of goals and actions
The replication crisis facing the psychological sciences is widely regarded as rooted in methodological or statistical shortcomings. We argue that a large part of the problem is the lack of a ...
Forensic Science and the Scientific Method Abstract
The scientific method, a time-honored approach for discovering and testing scientific truth, does not and cannot work for the forensic sciences in its standard form because it does not work for past events.
Crystal healing is a pseudoscientific alternative medicine technique that uses semiprecious stones and crystals such as quartz, amethyst or opals. Adherents of the technique claim that these have healing powers, although there is no scientific basis for this claim.
