

# Download Trolleys Under The Hub Images Of America

A tram (in North America streetcar or trolley) is a rail vehicle which runs on tramway tracks along public urban streets; some include segments of segregated right-of-way. The interurban (or radial railway) is a type of electric railway, with streetcar-like light electric self-propelled railcars which run within and between cities or towns. Above: Frank Sprague, pioneer of trolleys and electric cars: 1886 - Frank Sprague invents a high torque DC traction motor. It is capable of consistent speed under varying loads and does not create sparks. Arlington, Massachusetts is a great place to live, except for: The missing and hidden street name signs, though it is a common problem in New England.
