

Download Understanding Substance Addictions Assessment And Intervention

Points to Remember Drug addiction is a chronic disease characterized by drug seeking and use that is compulsive, or difficult to control, despite harmful consequences. Addiction is a brain disorder characterized by compulsive engagement in rewarding stimuli despite adverse consequences. Despite the involvement of a number of psychosocial factors, a biological process – one which is induced by repeated exposure to an addictive stimulus – is the core pathology that drives the development and maintenance of ...We are a NAADAC-recognized educational provider for professional addictions training offering face to face and online certification and recertification courses for substance abuse counselors and other addictions professionals.pathways2108@gmail.com | 415.267.6916.
