

Download Weblogic Server Administration Guide

Oracle WebLogic Server is a Java EE application server currently developed by Oracle Corporation. Oracle acquired WebLogic Server when it purchased BEA Systems in 2008. ORACLE DATA SHEET Oracle WebLogic Suite Oracle WebLogic Suite is the flagship Oracle WebLogic Server edition. It includes all of the capabilities of Oracle By default, WebLogic Server has host name verification enabled. As a function of the SSL handshake, WebLogic Server compares the common name in the SubjectDN in the SSL server's digital certificate with the host name of the SSL server used to initiate the SSL connection. The tuning defaults discussed in throughout WebLogic Performance and Tuning Guide refer to the "development mode" defaults, which is the default startup mode when WebLogic Server is installed.
